Login to the application using username and password as in test data. 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password}	User should login to the application.
TC - 102	To verify whether the check-out date field accepts a later date than check-in date.	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-in-date later than the check-out-date field as in test data. 8. Verify that system gives an error saying 'check-in-date should not be later than check-out-date'. 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel creek Room type: standard No-of-rooms:1 Check-in-date: today + 7 date Checkout date:today+5 date	System should report an error message.
TC - 103	To check if error is reported if check-out date field is	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using 	URL: http://adactin.com/HotelApp/index.php User:{test	System should report an error message 'Enter Valid dates'.

	in the past	username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Verify that application throws error message	username} Password:{test password} Location: Sydney Hotel: Hotel Creek Room type: standard No-of-rooms:1 Check-in-date: today's -5 date Checkout date: today's -3 date	
TC-104	To verify whether locations in Select Hotel page are displayed according to the location selected in Search Hotel	1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Verify that hotel displayed is the same as selected in search Hotel form.	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek Room type: standard No-of-rooms:1 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children: 0	Location displayed in Select Hotel should be the same as location selected in search hotel form.
TC-105	To verify whether Check-in	1. Launch hotel reservation application using	URL: http://adactin.com/HotelApp/index.php	Check-in-date and check-out-date should be

	date and Check Out date are being displayed in Select Hotel page according to the dates selected in search Hotel.	<ol style="list-style-type: none"> URL as in test data. Login to the application using username and password as in test data. Select location as in test data. Select hotel as in test data. Select room type as in test data. Select no-of-rooms as in test data. Enter check-out-date as in test data. Select No-of-adults as in test data. Select No-of-children as in test data. Click on Search button. Verify that check-in-date and check-out-dates are the same as selected in search hotel form. 	<p>p</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:1</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children:0</p>	displayed according to the data entered in search hotel form.
TC-106	To verify whether no. of rooms entry in Select Hotel page is same as the Number of rooms selected in search hotel page	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Select location as in test data. Select hotel as in test data. Select room type as in test data. Select no-of-rooms as in test data. Enter check-out-date as in test data. Select No-of-adults as in test data. Select No-of-children as in test data. 	<p>URL: http://adactin.com/HotelApp/index.php</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:3</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children: 0</p>	No-of-rooms should be displayed and match with number of rooms in search hotel page

		<ol style="list-style-type: none"> Click on Search button. Verify that no-of-rooms is reflected according to the number of rooms selected in search hotel page. 		
TC-107	To verify whether Room Type in Select Hotel page is same as Room type selected in search hotel page	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Select location as in test data. Select hotel as in test data. Select room type as in test data. Select no-of-rooms as in test data. Enter check-out-date as in test data. Select No-of-adults as in test data. Select No-of-children as in test data. Click on Search button. Verify that room type reflected is the same as selected in search hotel page. 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek Room type: Deluxe No-of-rooms:1 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children:0	Room type displayed should be the same as selected in search hotel page
TC-108	To verify whether the total price (excl.GST) is calculated as "price per night * no. of nights* no of rooms".	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Select location as in test data. 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek	Total price =2*1*125=250\$

		<ol style="list-style-type: none"> 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button 12. Verify that total-price(excl.GST) is being calculated as (price-per-night*no-of-rooms*no-of-days) 	Room type: standard No-of-rooms:2 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children: 0	
TC-109	To verify when pressed, logout button logs out from the application.	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button. 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek Room type: standard No-of-rooms:2 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children:0	User should logout from the application.

		<ol style="list-style-type: none"> 12. Enter the details and click on book now. 13. Check the details, click on logout and verify we have been logged out of the application. 		
TC-110	To check correct total price is being calculated as "price per night*no of days*no of rooms in Book a hotel page	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button 12. Verify that total-price is being calculated as (price-per-night*no-of-rooms*no-of-days + 10% GST") 	URL: http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Melbourne Hotel: hotel Creek Room type: standard No-of-rooms:2 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children:0	Total-price should be calculated as (price-per-night*no-of-rooms*no-of-days Total Price= 125*2*1 = 250\$ In book a hotel page
TC-111	To check Hotel name, Location, room type, Total Day, price per	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the 	URL: http://adactin.com/HotelApp/index.php User:{test username}	Data should be same as selected in previous screen

	night are same in Booking confirmation page as they were selected in previous screen	<p>application using username and password as in test data.</p> <ol style="list-style-type: none"> 3. Select location as in test data. 4. Select Hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button 12. Verify that total-price is being calculated as (price-per- night*no-of-rooms*no-of-days 	<p>Password:{test password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:2</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children:0</p>	
TC-112	To check correct Final billed price is Total Price + 10% Total price in Book a Hotel page	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. Select Hotel as in test data. 4. Select room type as in test data. 5. Select no-of-rooms as in test data. 6. Enter check-out-date as in test data. 7. Select No-of-adults as in test data. 8. Select No-of-children as in test data. 	<p>URL: http://adactin.com/HotelApp/index.php</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:2</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children:0</p>	Final billed Price=125+12.5=137.5 in Book a Hotel page

		<ol style="list-style-type: none"> Click on Search button. Select the hotel and click on continue button Verify that total-price is being calculated as (price-per-night*no-of-rooms*no-of-days) 		
TC-113	To verify whether the data displayed is same as the selected data in Book hotel page	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Select location as in test data. Select Hotel as in test data. Select room type as in test data. Select no-of-rooms as in test data. Enter check-out-date as in test data. Select No-of-adults as in test data. Select No-of-children as in test data. Click on Search button. Select the hotel and click on continue button Verify that total-price is being calculated as (price-per-night*no-of-rooms*no-of-days) 	<p>URL: http://adactin.com/HotelApp/index.php</p> <p>User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek Room type: standard No-of-rooms:2 Check-in-date: today's date Checkoutdate: today+1 date No-of-adults:1 No-of-children: 0</p>	<p>Hotel: hotel Creek Room type: Standard No-of-rooms:2 Check-in-date:27/07/2012 Checkoutdate:28/07/2012 No-of-adults:1 No-of-children: 0</p>
TC-114	Verify Order number is generated in booking confirmation page	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test 	<p>URL: http://adactin.com/HotelApp/index.php</p> <p>User:{test username} Password:{test</p>	ORDER no should be generated

		<p>data.</p> <ol style="list-style-type: none"> 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button 12. Verify that total-price is being calculated as (price-per-night*no-of-rooms*no-of-days 	<p>password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:2</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children: 0</p>	
TC-115	To verify whether the booked itinerary details are not editable.	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select Hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 	<p>http://adactin.com/HotelApp/index.php</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Location: Adelaide</p> <p>Hotel: hotel Cornice</p> <p>Room type: standard</p> <p>No-of-rooms:2</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children: 0</p>	Details once accepted should not be editable

		<ol style="list-style-type: none"> 11. Select the hotel and click on continue button 12. Fill the form and click on Book now button. 13. Click on My itinerary button 14. Verify that the details are not editable 		
TC-116	To check whether the booked itinerary reflects the correct information in line with the booking.	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Select location as in test data. 4. Select hotel as in test data. 5. Select room type as in test data. 6. Select no-of-rooms as in test data. 7. Enter check-out-date as in test data. 8. Select No-of-adults as in test data. 9. Select No-of-children as in test data. 10. Click on Search button. 11. Select the hotel and click on continue button 12. Fill the form and click on Book now button. 13. Click on My itinerary button 14. Verify that the details are reflected correctly as per the booking 	http://adactin.com/HotelApp/index.php User:{test username} Password:{test password} Location: Sydney Hotel: hotel Creek Room type: standard No-of-rooms:2 Check-in-date: today's date Checkoutdate:today+1 date No-of-adults:1 No-of-children: 0	Itinerary should reflect the correct information in line with the booking.
TC-117	To check whether	<ol style="list-style-type: none"> 1. Launch hotel reservation application using 	http://adactin.com/HotelApp/index.php	Search Order ID query should

	"search order id" query is working and displaying the relevant details.	<ol style="list-style-type: none"> URL as in test data. Login to the application using username and password as in test data. Click on booked itinerary button. Enter the order id. Verify that the relevant details are displayed 	<p>p</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Order id :pick existing order id</p>	display the relevant details for Order ID
TC-118	Verify that all the details of newly generated order number in booked itinerary page are correct and match with data during booking.	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Book an order as in previous test cases Click on booked itinerary button Search for Order number Verify all the details of order number are correct as entered during saving order 	<p>http://adactin.com/HotelApp/index.php</p> <p>p</p> <p>User:{test username}</p> <p>Password:{test password}</p> <p>Location: Sydney</p> <p>Hotel: hotel Creek</p> <p>Room type: standard</p> <p>No-of-rooms:2</p> <p>Check-in-date: today's date</p> <p>Checkoutdate:today+1 date</p> <p>No-of-adults:1</p> <p>No-of-children: 0</p>	All the details in booked itinerary page should be same as those entered during booking
TC-119	To verify that the order gets cancelled after click on Cancel order number link	<ol style="list-style-type: none"> Launch hotel reservation application using URL as in test data. Login to the application using username and password as in test data. Book the Hotel as in previous test cases. Keep a note of order number generated Click on Booked 	<p>http://adactin.com/HotelApp/index.php</p> <p>p</p> <p>User:{test username}</p> <p>Password:{test password}</p>	Order number should not longer be present in booked itinerary page after cancellation

		<p>Itinerary</p> <ol style="list-style-type: none"> 5. Search for order number booked 6. Click on Cancel <Order Number> 7. Click Yes on pop-up which asks where to cancel order or not 8. Verify that order number is cancelled and now longer exists in Booked Itinerary page 		
TC-120	To Verify Title of every Page reflects what the page objective is. For example Title of Search Hotel page should have "Search Hotel"	<ol style="list-style-type: none"> 1. Launch hotel reservation application using URL as in test data. 2. Login to the application using username and password as in test data. 3. Verify that title of each page is the same as the page objective 4. Click on Search hotel option and verify whether application directs to search hotel form 5. Click on booked itinerary button and verify that application directs to booked itinerary form 	http://adactin.com/HotelApp/index.php User:{test username} Password:{test password}	Title of each page should reflect its objective and the buttons should redirect as specified, to the relevant page.
